Summary of Investment Objective

The Fund's investment objective is to seek capital appreciation through a diversified, value-oriented approach, with a secondary objective of seeking income. The Fund generally invests in equity securities of companies of any market capitalisation located anywhere in the world, including Emerging Markets, as well as fixed and floating rate debt securities and debt obligations issued by government, government-related and/or corporate entities worldwide. The Fund makes an allocation of its assets between three different investment strategies followed independently by the Templeton Global Macro, Templeton Global Equity and Franklin Mutual Series management groups, with the aim to maintain an equal exposure to two global equity strategies and one global fixed income strategy, subject to appropriate monitoring and rebalancing.

Portfolio Data Derivatives Disclosures

Market value figures reflect the trading value of the investments. Average Duration, Average Weighted Maturity, Yield to Maturity and Yield to Worst reflect certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

What are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested.

Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments.

The Fund invests mainly in equity and debt securities of companies around the world, including emerging markets. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate considerably over time.

Other significant risks include: credit risk, derivatives risk, emerging markets risk, liquidity risk, currency risk, Shanghai-Hong Kong Stock Connect risk.

For full details of all of the risks applicable to this Fund, please refer to the "Risk Considerations" section of the Fund in the current prospectus of Franklin Templeton Investment Funds.

Top Ten Equity Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

Fund Measures: The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying bonds and generally ranges from AAA (highest) to D (lowest). For unrated bonds ratings may be assigned based on the ratings of the issuer or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower rated bonds. The ACQ is provided for informational purposes only. Derivative positions are not reflected in the ACQ.
