Term

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

Objectives

Investment Objective

To seek long-term and stable investment growth, through a combination of income and growth of capital (total return), from a portfolio of global infrastructure securities.

Investment Policy

The Fund mainly invests in equity and equity related securities of companies in infrastructure sectors, such as utilities, transport, community and social infrastructure, and communications. These investments may be from anywhere in the world, including China and other emerging markets.

These investments may include depositary receipts. To a lesser extent, the Fund may invest in infrastructure-related real estate Funds.

Derivatives and techniques The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth (in accordance with the risk profile of the Fund).

Strategy The investment manager uses Fundamental analysis to select long-term investments in a concentrated portfolio of companies that appear to offer predictable cash flows and low earnings volatility and benefit from limited competition due to high barriers to entry. It also favours companies that tend to be better protected from inflation.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator:

- Emerging Markets risk
- Infrastructure risk

For the other risks applicable to this Fund, please refer to the Primary Risks section of the Fund supplement contained within the prospectus of the Fund. This product does not include any protection from future market performance so you could lose some or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000 is invested

Costs over Time	If you exit after 1 year	If you exit after 5 years
Total costs	741 EUR	2 249 EUR
Annual cost impact (*)	7.4%	3.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.3% before costs and 4.8% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
