What is this product?

Type

The product is a share class of the sub-fund Franklin U.S. Managed Income 2028 Fund (the "Fund") which is part of Franklin Templeton Opportunities Funds, an open-ended investment company with variable capital (SICAV), qualifying as a UCITS.

Term

In 2028 ("Maturity"). Before the Fund's Maturity, the Investment Manager will write to investors setting out the options available to them which may include, but are not limited to, the liquidation of the Fund, a switch or merger into Shares of other Funds of the Company or other UCITS of the Franklin Templeton group or a change of the investment objective and policy. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

Objectives

Investment Objective

To seek to provide regular income, while pursuing some degree of capital appreciation, through a pre-determined period.

Under normal market conditions, the Fund targets an annualised share price volatility of 6.5%, with a maximum of 8.5% (not guaranteed).

Investment Policy

The Fund mainly invests, directly or indirectly through derivatives, in equities and corporate and government bonds in the US. Some of the bond investments may be below investment grade.

These investments may include depositary receipts, convertible securities, including contingent convertible bonds, securities of companies that are, or are about to be, involved in reorganisations, financial restructurings or bankruptcy and securities that are in default. To a lesser extent, the Fund may invest in asset- and mortgage-backed securities and in real estate funds.

In the period leading up to the maturity date in 2028 (the wind-down period), the Fund may gradually shift its investments to money market instruments and other cash-like assets.

Derivatives and techniques The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth.

Strategy The investment manager combines macroeconomic, interest rate, credit and issuer analysis to flexibly allocate investments across asset classes based on market conditions. For each asset class, the investment manager then selects securities that appear to offer above-average return potential while keeping the portfolio within the desired risk level.

SFDR category Article 6 (does not promote environmental and/or social characteristics or have a sustainable investment objective under EU regulations).

Base currency Euro (EUR).

Benchmark(s) 35% MSCI USA High Dividend Yield (EUR)-NR, 15% Bloomberg High Yield Very Liquid (EUR hedged) and 50% Bloomberg US Aggregate (EUR hedged) Index. Used for performance comparison only.

The Fund is actively managed and may deviate materially from that of the benchmark(s).

Share Class Policy

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

Buying and selling shares

You may normally buy or sell shares on any day banks are open for business in the United Kingdom.

Intended retail Investor

Investors who understand the risks of the Fund and plan to invest until the Fund's maturity date. The Fund may appeal to investors who:

• are looking for a combination of income and investment growth
• are interested in exposure to a mixed asset allocation as part of a diversified portfolio
• have a medium risk profile and can tolerate moderate short-term changes in the share price

Product availability The fund is closed to new investors and additional investments from existing shareholders.

Terms to understand

bonds, below investment grade: Bonds represent an obligation to repay a debt, along with interest. Below investment grade bonds generally pay higher interest rates but are considered less likely to make all scheduled payments or repay the initial debt.

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

equities: Securities that represent partial ownership of a company.

money market instruments: Financial instruments designed to provide stable value, interest, high liquidity and a very low risk of loss.

convertible securities: Bonds that offer the option or the obligation of receiving repayment of principal either in cash or shares in the company.

depositary receipts: Certificates of ownership that allow shares to trade in markets where they are not registered.

asset- and mortgage- backed securities: Bonds backed by consumer debt (such as mortgages, credit card and other loan-type debt) and whose income derives from the payments received from the underlying borrowers.

Depositary

J.P. Morgan SE, Luxembourg Branch

What are the risks and what could I get in return?

Risk Indicator

1	2	3	4	5	6	7

Lower risk — Higher risk

The risk indicator assumes you keep the product for 4 year(s). The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator:

- Credit risk
- Counterparty risk

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of the Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 4 years

Example Investment: 10000 EUR

Scenarios	Returns	If you exit after 1 year	If you exit after 4 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	-	-
Stress	What you might get back after costs	4 930 EUR	7 120 EUR
Stress	Average return each year	-50.70%	-8.14%
Unfavourable	What you might get back after costs	8 800 EUR	9 590 EUR
Unfavourable	Average return each year	-12.00%	-1.04%
Moderate	What you might get back after costs	10 050 EUR	10 850 EUR
Moderate	Average return each year	0.50%	2.06%
Favourable	What you might get back after costs	11 170 EUR	11 800 EUR
Favourable	Average return each year	11.70%	4.22%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between October 2019 and October 2023.

Moderate scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between June 2020 and June 2024.

Favourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between September 2015 and September 2019.

What happens if Franklin Templeton International Services S.à r.l. is unable to pay out?

Franklin Templeton International Services S.à r.l. ("FTIS") is the management company of the Fund, but the assets of the Fund are held separately from FTIS by the depositary. J.P. Morgan SE, Luxembourg branch, as the appointed depositary, is liable to the Fund or its shareholders for losses caused by its negligent or intentional failure to fulfill its safekeeping or record-keeping obligations (cash could however be lost in case of default of the depositary or its delegates).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000 is invested

Costs over Time	If you exit after 1 year	If you exit after 4 years
Total costs	319 EUR	764 EUR
Annual cost impact (*)	3.2%	1.8% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.9% before costs and 2.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Please note that the figures shown here do not include any additional fees that may be charged by your distributor, advisor or any insurance wrapper in which the fund may be placed.

Composition of Costs
