Specifically, the Fund aims to maintain an annualised fluctuation (volatility) of its net asset value between 5% and 8% (not guaranteed).

Investment Policy

The Fund mainly invests, directly or indirectly through derivatives and other Funds, in equities (up to 75% of assets), bonds and other asset classes, such as real estate and commodities. These investments may be of any market capitalisation and from anywhere in the world, including emerging markets, and some of the bond investments may be below investment grade.

These investments may include convertible securities, including contingent convertible bonds, securities that are distressed or in default or issued by companies that are restructuring or going through bankruptcy.

Derivatives and techniques The Fund may use derivatives for reducing risks (hedging) and costs, and to generate additional income or growth.

The investment manager applies a proprietary rating methodology using various ESG criteria to assess long-term opportunities and risks. The Fund favours high-performing companies on ESG factors such as carbon emission reduction and board gender diversity and excludes or restricts investments in certain industries that are harmful to the environment or society, such as thermal coal, weapons and tobacco.

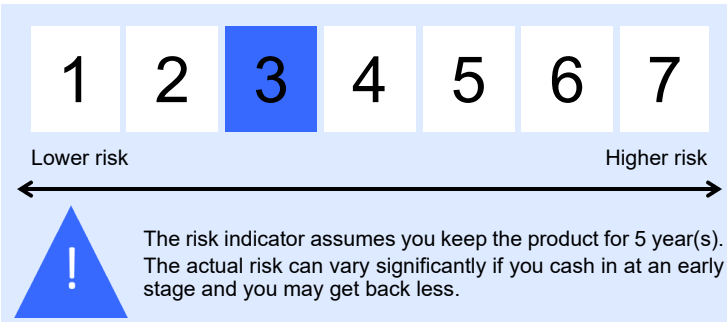
What are the risks and what could I get in return?

Risk Indicator



The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator:

• Derivative risk

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of the Fund.

These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
