Franklin Mutual European Fund

Class A (acc) EUR • ISIN LU0140363002 • A sub-fund of Franklin Templeton Investment Funds

The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Mutual European Fund (the "Fund") aims to increase the value of its investments and, secondarily, to earn income over the medium to long term.

The Fund pursues an actively managed investment strategy and invests mainly in:
- equity securities issued by companies of any size located in European countries

The Fund can invest to a lesser extent in:
- equity securities issued by companies involved in mergers, consolidations, liquidations or other major corporate transactions
- debt securities of any quality (including lower quality debt such as non-investment grade securities) of companies involved in reorganisation or financial restructuring
- securities of non-European issuers (up to 10% of assets)
- derivatives for hedging, efficient portfolio management and/or investment purposes

In exceptional market circumstances, the Fund may temporarily hold a greater amount of cash in times where the manager believes that the markets are experiencing excessive volatility, a prolonged general decline or other adverse conditions.

Although the Fund generally invests in at least five countries, it may invest in as few as one or two. The Fund currently intends to invest principally in securities of issuers in western Europe. The investment team uses in-depth, fundamental research and analysis to find and purchase those equity and debt securities that are believed to be trading at a discount.

You may request the sale of your shares on any Luxembourg business day. The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section "Fund Information, Objectives and Investment Policies" of the current prospectus of Franklin Templeton Investment Funds.

The benchmark of the Fund is the MSCI Europe Index-NR. The benchmark is indicated for information purposes only, and the Fund manager does not intend to track it. The Fund can deviate from this benchmark.

Terms to Understand

Debt securities: Securities representing the issuer’s obligation to repay a loan at a specified date and to pay interest.

Derivatives: Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

Equity securities: Securities that represent an ownership stake in a company.

Hedging: A strategy for totally or partially offsetting particular risks such as those arising from fluctuations in share prices, currencies or interest rates.

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior. Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in equity and equity-related securities of companies located in or doing significant business in European countries. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton Investment Funds.
Charges
The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
